

Feeling Tired?

Help Us Understand How Fatigue Affects Movement and Motivation

The Mobility & Motivation Lab at **San Diego State University** wants to learn how the brain and body respond to **fatigue in aging and Parkinson's disease**.

Who Can Join?

- Adults who are 18 to 80 years old with or without persistent fatigue
- People diagnosed with Parkinson's disease

Duration

- A single visit
- Up to 4 hours
- Possible follow-up visit

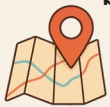

What Will You Do?

- Walking on a treadmill on varying inclines and making decisions about your effort
- Answer questions about your health, mobility, and motivation
- Some participants may be invited for a follow-up brain imaging (MRI) session

Sign Up Here:
